Web3.js

Experience

Full Stack Developer - Stanum LLC

Dec 2023 - Present | Remote, Part time

Responsibilities:

- Working on building product in space exploration and satellite deployment domain Using React (Typescript, Antd, React Query, Feathers API) on frontend. NodeJS (Feathers, Knex, PostgreSQL) on backend
- Developing new features to the platform that manage city traffic lights data, fixing bugs (Angular + Taiga UI), fixing bugs and updating functionality of a backend (Python + FastAPI)

Freelancing

Nov 2022 - Dec 2023 | Portugal

Responsibilities:

- Worked on creating NodeJS scraping bot for automated visa slots checks (solo work, used 2captcha, puppeteer, telegram API).
- Creating NFT marketplace using web3 technologies (blockchain, metamask wallet), lead frontend team, wrote solidity smart contracts and deployed them, deployed app with AWS (Amplify), reviewed code, wrote NodeJS backend.

Projects & domains:

- Scraper bot - Tourism
- Grimace NFT Marketplace - Web3, NFT

Frontend Software Engineer at Globant

Dec 2020 - Nov 2022 | Minsk, Remote

Responsibilities:

- Contributed to the launch of multiple web apps like nflallday.com. ufcstrike.com. news.depop.com. connector.depop.com.
- Developing react components, managing app state, using rest api, writing backend (node.js, express), writing tests (jest), reviewing code, participating in daily meetups, present demo to the client at the end of a sprint, brainstorming problems.

Frontend Developer - Epam

December 2019 - December 2020 | Minsk, Remote

Responsibilities:

- Played a key role in developing and maintaining an online store used by Thomson Reuters to sell tax, audit, accounting, and finance products.
- Created a well-tested React (TypeScript) components library.
- Collaborated with different teams and conducted code reviews.
- Ensured app performance by monitoring and optimizing code.
- Communicated effectively with stakeholders to meet project requirements.

Projects & domains:

- TR Tax Store - Financial Services

Frontend Developer - Lasting Dynamics

November 2018 - December 2019 | Remote

Responsibilities:

- Worked on a work management system using React, TypeScript, GraphQL, and various frontend tools.
- Wrote and tested well-performing components.
- Conducted code reviews and contributed to improving app performance.
- Collaborated with the remote team to deliver a successful product.

Projects & domains

- Round Rush - Project Management

Full Stack Developer - DiscreteMind

April 2018 - November 2018 | Minsk

Responsibilities:

- Developed various web projects, both frontend and backend, using React, Redux, and NodeJS.
- Created reusable React components and REST API endpoints.
- Designed the MVP, ensuring a seamless user experience.
- Utilized Golang and NodeJS for backend development.

Projects & domains

- Rice Exchange - Agriculture & Trade
